## Overview

---

MIAX Emerald is the MIAX Exchange Group's (MIH) third fully electronic options trading exchange and has leveraged the industry leading technology and infrastructure developed by MIAX to serve as a counterpart to MIAX Options and MIAX PEARL by providing a pro-rata allocation and maker-taker pricing model. MIAX Emerald, along with MIAX PEARL, MIAX Options and the MIAX Options Complex Order System, provides members of the MIAX Exchange Group with access to all pricing and allocation models. The MIAX Emerald Trading System has been developed specifically for the unique demands of derivatives trading, providing best in class customer interface features, protections and extreme performance for users of the Exchange.

## Market Model

---

- Pro-Rata allocation
- Maker/Taker pricing

## Membership

---

- Types of Membership
  - Market Makers
    - Registered Market Maker (RMM)
    - Lead Market Maker (LMM)
    - Primary Lead Market Maker (PLMM)
  - Electronic Exchange Members
- Membership Process:
  - Holders in good standing of MIAX Options or MIAX PEARL Exchange Trading Permits are eligible to receive a MIAX Emerald Trading Permit through a short form waive-in membership process
  - Prospective member firms must be registered as a broker-dealer and must meet certain additional criteria described by the Exchange in the Exchange's Rules
- Further information on membership at MIAX Emerald, is available on the MIAX Website

## Market Access

---

### **MIAX Express Interface (MEI)**

- MIAX Express Interface (MEI) offers Market Makers direct connections to each matching engine for high-speed mass quoting. Each full service MEI is capable of processing more than 200,000 quote messages per second
- Three types of MEI ports are available
  - Full Service MEI Port
    - All input message types are supported
  - Limited Service MEI Port
    - Supports all message types except bulk quotes
  - Priority Purge Port
    - Supports only Quote Mass Cancel Messages

### **FIX Order Interface (FOI) gateway**

- Electronic Exchange Members (EEMs) send FIX orders to the Exchange's systems through the FOI gateway. Each FOI is capable of processing more than 7,700 order messages per second

## Data Center Services

---

### **Network Infrastructure**

- The MIAX Express Network Interface (MENI) was designed to complement the MIAX options exchanges and was built from the ground up to address the performance and security needs of a high speed trading platform. MIAX Emerald uses MENI along with MIAX Options and MIAX Pearl.
  - The MENI infrastructure utilizes fully diverse and redundant 40Gbps backbones and 10/40Gbps switch technology for maximum throughput and minimal latency using its own dedicated extranet switches
  - The MENI infrastructure is located in the Equinix NY4 data center
    - Customers can cross-connect to the MENI from elsewhere within the Equinix NY4 facility
    - MENI cross-connects are latency equalized to ensure each participant's cross-connect is the same physical distance from the interconnect regardless of their location in the Equinix NY4 facility
    - MIAX Emerald members may share 1Gig connections across all three MIAX exchanges. Dedicated 10Gig ULL connections are

available for MIAX Emerald, but cannot be used to access other MIAX Equity Options platforms

- 1 Gigabit and 10 Gigabit LL connections are available and capable of accessing Emerald and any or all of the other MIAX Equity Options platforms in the CH4 disaster recovery center

## Connectivity

---

- MIAX Emerald utilizes the same or similar APIs and protocols as other exchanges in the MIAX Exchange Group, minimizing complexity of connectivity for prospective membersMIAX supports the following connectivity options
  - Cross connection
  - Point-to-point connection
  - Metro Ethernet/Dark Fiber connection
- Users are strongly encouraged to establish dual connections to the primary facility in NY4 and connection to the disaster recovery system located in Chicago (CH4) to minimize the possibility of service disruption
- Exchange Codes
  - MIC code: EMLD
  - OCC Exchange code: D
  - OPRA: D
  - COATS: E
  - OATS: OE
  - Blue sheet – Exchange Code: 9
  - Blue sheet – Requestor Code: 7
  - The EMLD Requestor Code will be '7' to match MIAX Options.
  - The Requestor Code is by Exchange family so just one code is needed

## Fees

---

### Transaction Fees

The full MIAX Emerald fee schedule is available on the Exchange's website.

[MIAX Emerald Fee Schedule](#)

## Market Data

---

### Top of Market (ToM) Feed

Get the MIAX Emerald BBO (EBBO) and Trade Report market data via our hyper fast Top of Market feed. [Top of Market Feed Specification](#)

### Administrative Information Subscriber (AIS) Feed

The AIS feed provides timely delivery of important notification messages such as Series Updates, System State and Liquidity Seeking Events. [Administrative Information Subscriber Feed Specification](#)

### MIAX Order (MOR) Feed

MOR is a high speed real-time feed that publishes all actionable orders in addition to Series Updates, System State and Underlying Trading Status messages. [MIAX Order Feed Specification](#)

### Complex Top of Market (cToM) Feed

The Complex Top of Market (cToM) provides subscribers with the current Complex EBBO (cEBBO) and Strategy Last Sale prices for all active Strategies using MIAX's high speed technology platform. Complex Order functionality may be enabled or disabled via Regulatory Circular.

[Complex Top of Market Feed Specification](#)

### Clearing Trade Drop (CTD) Feed

The MIAX Clearing Trade Drop feed provides real-time clearing trade content to firms using the same ultra-low latency technology provided throughout the MIAX platform.
